International Journal of Performability Engineering, Vol. 18, No. 11, November 2022**

Author(s)	Title of the Paper	Pages
Risu Na, Weiguo Zhang, Kaifa Jia, and Quan Zhang	Key Factors of Seal Ring Reliability based on QFD	759-769
Besma Saker and Rachid Chaib	Effective and Sustainable Management of Risk Disrupting the Supply Chain Activities: The Case of the ETRAG Company	770-780
Sanjay Razdan, Himanshu Gupta, and Ashish Seth	A Multi-Layer Feed Forward Network Intrusion Detection System using Individual Component Optimization Methodology for Cloud Computing	781-790
Pawan Wawage and Yogesh Deshpande	Real-Time Prediction of Car Driver's Emotions using Facial Expression with a Convolutional Neural Network-based Intelligent System	791-797
K. Eswara Rao, G. Appa Rao, and P. Sankara Rao	A Weighted Ada-Boosting Approach for Software Defect Prediction using Characterized Code Features Associated with Software Quality	798-807
Palak Girdhar, Prashant Johri, and Deepali Virmani	An Improved Empirical Hyper-Parameter Tuned Supervised Model for Human Activity Recognition based on Motion Flow and Deep Learning	808-816
Mamta Bhamare and K Ashokkumar	Personality Prediction through Social Media Posts	817-825
Lakshmi Kala Pampana and Manjula Sri Rayudu	Multi-Class Classification of Retinal Abnormality using Machine Learning Algorithms	826-832
