International Journal of Performability Engineering, Vol. 19, No. 1, January 2023**

Author(s)	Title of the Paper	Pages
Weihan Yang, Feng Qu, Fei He, and Wei He	Hierarchical 2D/3D Alignment Method based on Enhanced DRR and Gradient Direction Weighted Histogram	1-9
Abderraouf Bouafia, Mohammed Bougofa, Mohamed Salah Medjram, and Ahmed Mebarki	Quantitative Risk Assessment Approach to a Dynamic Safety Evaluation: Skikda's Coastal City Liquefied Gas Plant	10-19
Darius Muyizere, Lawrence K. Letting, and Bernard B. Munyazikwiye	Effect on Transient Stability and Analyses Resulting from a Cyber-Attack on Frequency Relay Device	20-32
Arvind Kumar Mishra, Renuka Nagpal, Kirti Seth, and Rajni Sehgal	Maintainability of Service-Oriented Architecture using Hybrid K-means Clustering Approach	33-42
Priti Kumari and Parmeet Kaur	An Adaptable Approach to Fault Tolerance in Cloud Computing	43-54
Kanika Wadhwa, Shreshtha Singh, Arun Sharma, and Swaty Wadhwa	Machine Learning-based Breast Cancer Prediction Model	55-63
Manvika Singh and Vibhuti Rehalia	Analysis and Regulation of Power Profile of the Self-Sufficient Melded Renewable Energy Sources Microgrid System	64-75
Pawan Wawage, Yogesh Deshpande, and Kumar Manav	Analysis of Factors Influencing Safe Driving Behavior in Indian context using Manchester Driver Behavior Questionnaire	76-84
