| <b>Author(s)</b>  | <b>Title of the Paper</b>  | <b>Pages</b> |
|---|--|--------------|
| Shou-Yu Lee, Yu-Sheng Chu, Tzu-Wei Hsu, I-Hsiang Yu, and W. Eric Wong | Enhanced Recognition Approach for Herb Medicine using YOLOv8 in Medical Information Systems                                | 713-722      |
| Akanksha Mehndiratta and Krishna Asawa                                | Discovering Elementary Discourse Units in Textual Data using Canonical Correlation Analysis                                | 723-732      |
| Vipan and Raj Kumar   | Hybrid Fuzzy-Neuro and DNN-Based Framework for VM Allocation and Resource Optimization in Cloud Systems                    | 733-740      |
| Ammar Zakzouk, Bassim Oumran, and Hasan Hasan                         | ALLI: A High-Performance Approach to Data Deduplication in Hadoop using Enhanced Hashing and Two-Level Indexing Techniques | 741-752      |
| Annu Malik and Rashmi Kushwah   | Optimizing Energy Efficiency and Delay in IoT Networks using M/G/1 Queuing with Adaptive Vacation Policy                   | 753-763      |
| Deepika Singh, Shajee Mohan, and Preeti Dubey                         | Identifying Cyber Threats in Metaverse Learning Environment using Explainable Deep Neural Networks                         | 764-774      |
